

Fingerprint Duplication Archive

INFORMATION SHEET 1 - "How to Duplicate your Fingerprints"

PREPARATION

You will need : - White Fimo soft, Latex, Latex thickener, Knife, Synthetic paint brush.

INSTRUCTIONS

- 1) Knead Fimo clay until soft and smooth.
- 2) Role out clay (0.5cm thick) and cut into a 2.5cm x 3cm rectangle.
- 3) Press Finger into clay and remove slowly. Ensure a clear fingerprint impression has been produced.
- 4) Bake in a home oven (1300C/2650F for 30 min.).
- 5) Lightly brush latex into the print, avoiding any welling, and allow to dry. Repeat 3 times.
- 6) Add latex thickener to the latex and apply a further 2 coats. Leave to dry over night.
- 7) Carefully remove the latex patch from the cast and trim any unnecessary latex.
- 8) Attach to finger with a small amount of latex or prosthetics glue.
